Then you know how nice it can be and yet problematic too. I sometimes get messages that are 2 weeks late.

Oh Larry there are other areas of the country without cell service – I worked on Eureka, Utah for 12 years and cell service still did not exist when work was completed on that site in 2013. But thank you for sending your work phone #.

Paula-

For our addresses, I didn't think it mattered. I put down my cell phone # on that sheet but probably shouldn't have since I only have cell service when I travel from the site in Idaho. One of the last areas in US with no cell service. My work phone contact is 208-583-2511x231.

Thank you Larry. I now have his correct email address. Those pesky little things like large or small cap.

Larry – I sent out the sign-up sheet to everyone yesterday after the meeting but Nathan's email did not accept it. Can you forward my email yesterday with the meeting attendees to Nathan and copy me so that I have his correct email? Thank you.
